

## All Fires Trigger – San Diego County

Like many Southern California communities, San Diego is subject to ferocious wildfires that often impinge on the expanding urban areas of the county. Using FirstWatch, San Diego Fire Officials can view real-time information on all active fires across the county. FirstWatch pulls data from 9-1-1 centers serving the cities of San Diego, Oceanside and two regional JPA multi-jurisdictional 9-1-1 centers, serving 20 different agencies across San Diego County.

The All Fires Trigger pulls data from all four 9-1-1 centers (in real-time), across San Diego County and provides a single view of all active fire calls, including alerts indicating when shared assets, such as wildfire strike teams, are committed to other scenes. This Trigger also allows the centers to gather real-time information from fire incidents along jurisdictional borders that often result in calls from concerned citizens.

This map (right) shows all reported structure, vehicle, wild land or other types of fires, by pulling real-time data from multiple agencies across San Diego County.
