

## Performance PLUS (detailed drill-down) Tool

FirstWatch Enhancement Module

The screenshot shows the 'Performance Plus - Individual Performance' tool. At the top, there's a navigation bar with 'Individual Performance' highlighted. Below is a table with the following columns: Individual Performance, Total Current Events, Total Current Events in Compliance, Total Current Events Out of Compliance, Current Compliance%, Total Monthly Events, Total Monthly Event in Compliance, Total Monthly Events Out of Compliance, MTD Compliance%, and Current Average Elapsed. A callout bubble points to the 'Individual Performance' column header.

The FirstWatch **Performance PLUS** module allows for drill-down into performance criteria specific to units, people, shifts, stations, or other predefined variables. Performance Plus uses a combination of user-defined Primary and Sub-Triggers for measuring, monitoring and automating notifications of performance compliance at the overall system wide and now at the various individual levels.
