

20 YEARS OF IMPROVING PERFORMANCE & HARNESSING THE POWER OF YOUR DATA

FirstWatch® transforms ZOLL® CAD, ePCR, Fire RMS, and Billing data into real-time, actionable information

Once interfaced with your ZOLL data systems, FirstWatch enables automated, real-time data analysis, Dashboard and Mobile App Views – all based upon user-defined performance, operational, and quality measures! Currently deployed at more than 400 agencies across the U.S. and Canada, FirstWatch is a highly customizable data visualization tool designed to save time, money, and precious human resources – all while providing enhanced situational awareness, improved operational effectiveness, and better outcomes. FirstWatch customers are supported by a team with more than 500 combined years of experience in public safety and public safety software.

FIRST WATCH®

Every Record. In Real Time. Automatically.

FirstWatch Core Features

Harnessing the power of your data will improve your agency's performance and quality of patient care. Tap into the knowledge your data can provide with FirstWatch's multifaceted suite of real-time tools.

Real-Time Data

CAD, ePCR, ProQA, RMS, Lowcode, Billing, or Hospital ED
Data at your fingertips

Improve Performance

Monitor KPI's and adherence to patient care protocols for improved patient care

Early Event Detection

Alerts for early signs of chemical, radioactive, or occurring epidemics or pandemics

Dashboards

Quickly see the status of any dataset - take action in real-time

Easy Implementation

Easy to install, reliable and secure

Situational Awareness

Early recognition of suspicious activity, crime trends, arson patterns or activity around high-threat facilities

Enhancement Modules

FirstPass

Automated real-time quality improvement and protocol compliance

Online Compliance Utility (OCU)

Simplify and manage contract compliance for exceptions and exemptions reporting

Hospital Status Dashboard

Track how many units are en-route to, or at multiple hospital facilities

Transfer of Care (TOC)

Track patient handoff to monitor and improve destination times

Data Mover

Transfer data from FirstWatch to other applications or stakeholders

Billing Analytics Module (BAM)

Automated dashboards

Demand Analysis

Download select views of demand and consumption data into an Excel Spreadsheet

Reports

User defined parameters against data from within the FirstWatch system

Performance Plus

Monitor performance by individual, unit, shift, station etc.

Fire Operations Analytics Module (FOAM)

Helps with fire accreditation (CRFAI)

ProQA Dashboard

Monitor in near real-time ProQA usage

Academy Analytics

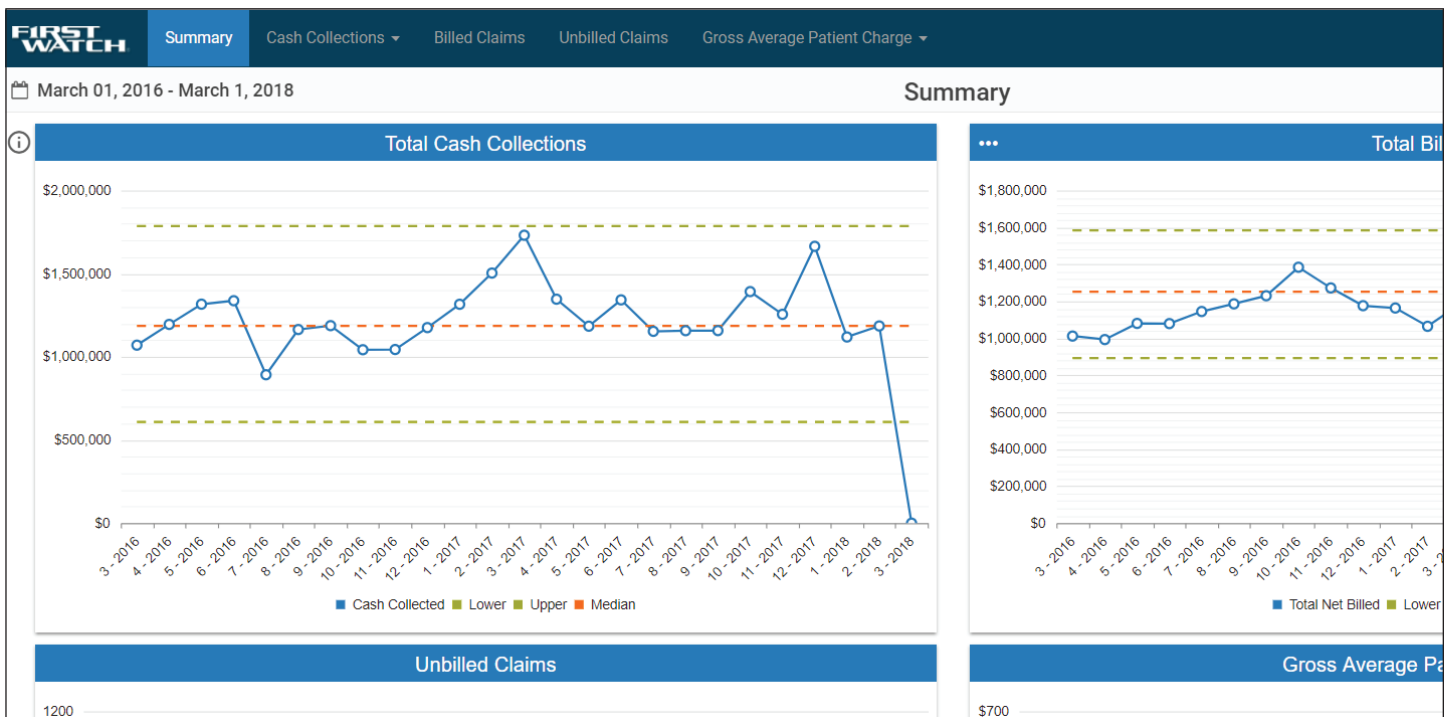

Improving system awareness and performance through real-time ProQA data analysis

Billing Analytics Module (BAM)

Our **NEW** Interactive Billing Dashboard is currently in development!

- Billing Summary view of Cash Collections, Billed Total, Gross Billing per Transport and Unbilled Total
- Billing views by Transport Type, Transport Mix, Charge Occurrence , Miles per Transport
- Cash Collections by Payor Source, by Facility

Real-Time Tracking of Opiates Overdoses

HEMSI - Opioid Trigger Current Call Information

Calls displayed represent active or performed calls between the hours of 1/3/2017 and 1/4/2017 11:59:59 PM.

Real-Time Tracking of Opiates Overdoses

IAED March/April 2017 Issue

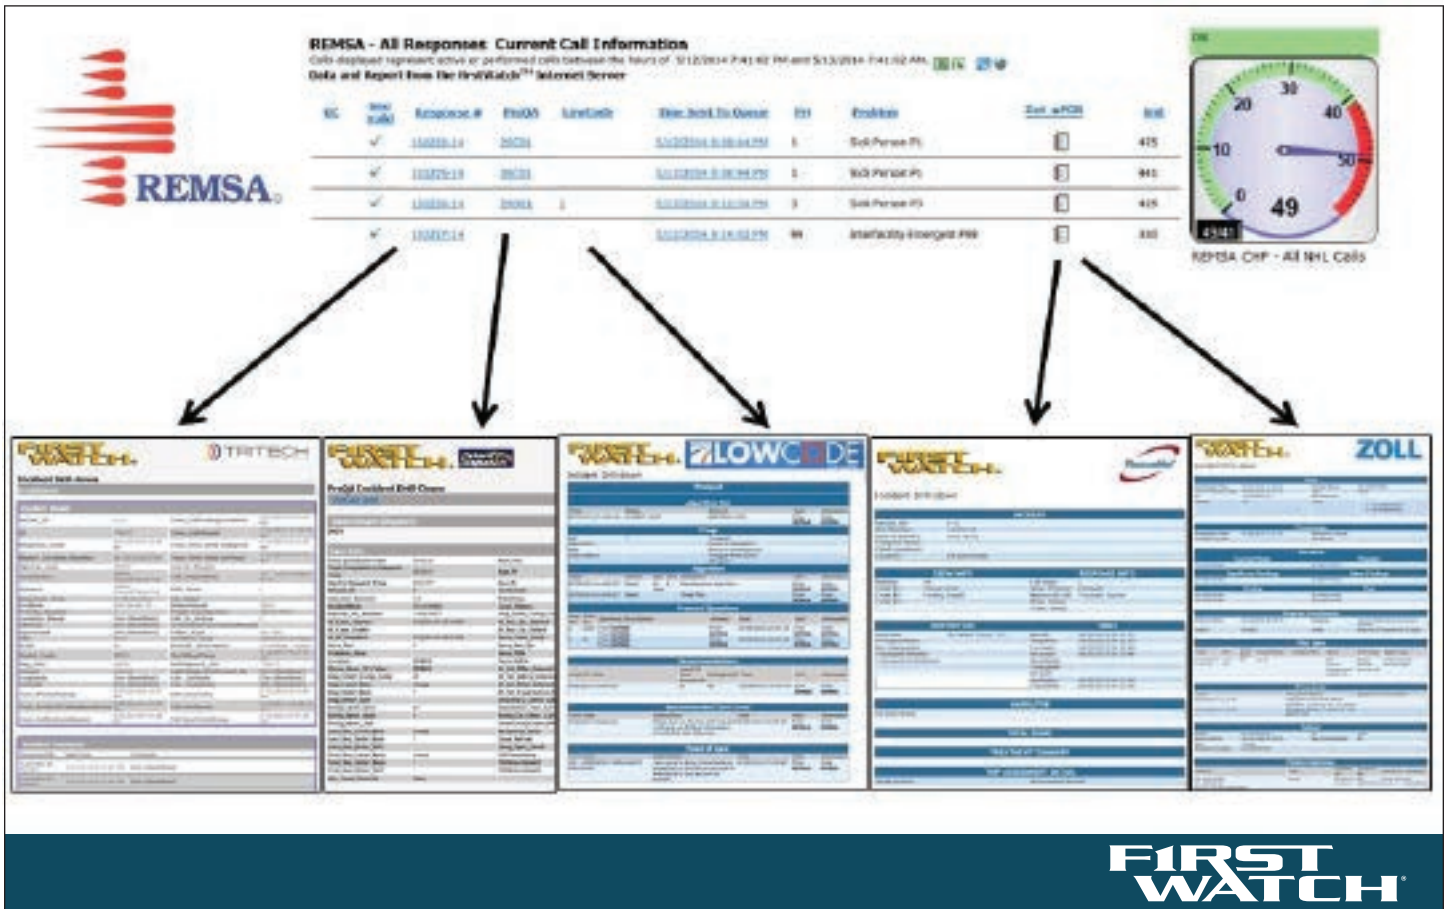

Crisis Proportions: Comm center strategies rally against opioid epidemic

Surveillance and multi-agency cooperation using and sharing CAD and electronic patient care reporting (ePCR) data is a strategy with the persistence to escalate the war against opioid abuse.

This article features FirstWatch customers like RAA, VA and ProEMS, MA who both use FirstWatch to track potential opioid-related calls by searching ePCRs for terms such as “Narcan” or “heroin”. Read the full article here:

<https://iaedjournal.org/crisis-proportions/>

1 Patient Encounter = 5 Data Sources

REMSA Community Health Early Intervention Team... *and the Role FirstWatch Plays*

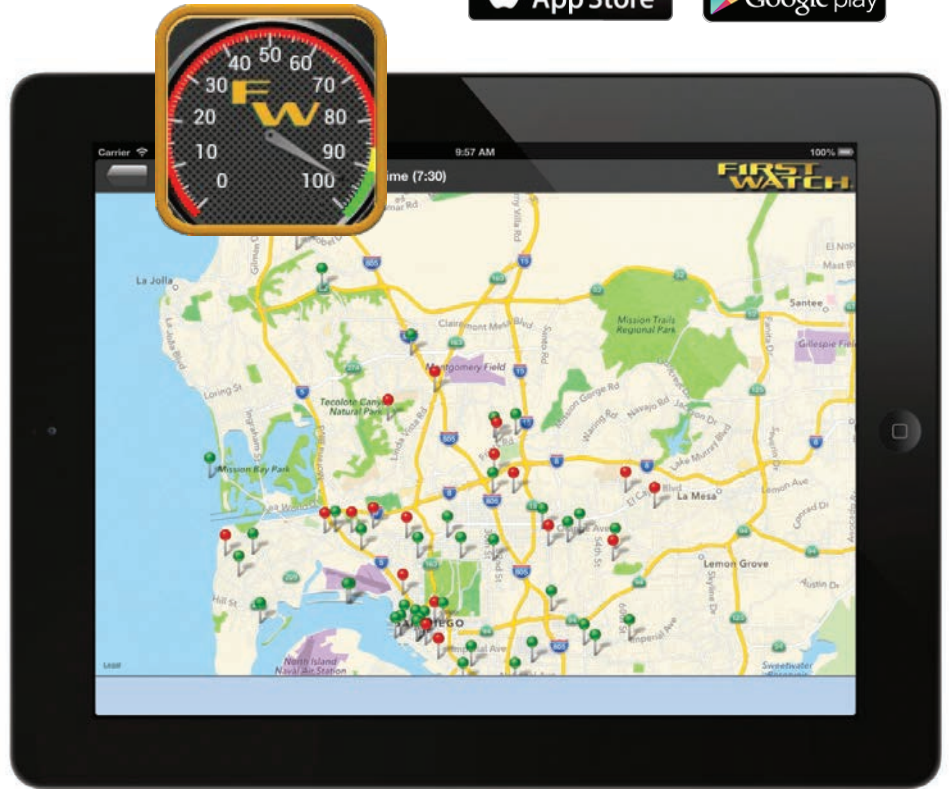

The Regional Emergency Medical Services Authority of Reno, Nevada, a non-profit provider of ground and air ambulance services (and long-time FirstWatch customer), in partnership with Renown Medical Group, the University of Nevada-Reno School of Community Health Sciences, the Washoe County Health District, and the State of Nevada Office of Emergency Medical Services, received an award to create a Community Health Early Intervention Team (CHIT) to respond to lower acuity and chronic Disease situations in urban, suburban, and rural areas of Washoe County Nevada.

FirstWatch is monitoring REMSA's CAD, ProQA, two ePCR sources and Low Code data source to provide near real-time data and actionable information that can be used to reach the project's goals of reducing: number of non-emergency visits, unreimbursed emergency department costs, hospital admissions, hospital readmissions, hospital stay times and ambulance transports.

FirstWatch Mobile for iOS and Android

Real-Time Dashboards for:

- Situational Awareness
- Response Times and KPIs
- Clinical and Operational Performance
- Automated Alerting
- Regional Data Aggregation and Sharing
- Bioterrorism
- Pandemic/Public Health Surveillance

The **Hospital Transport Status Dashboard** lists each primary hospital in the area, showing how many units are currently en-route to, or at each facility. Additionally, the dashboard provides: count of units transporting to and arrived at each hospital; average elapsed time and maximum time at hospital; visual warnings; by hospital / pre-defined counts and time thresholds; summary and detailed view of each hospital; custom sorting by hospital, allowing each hospital to see transports and times.

Available as an add-on feature to the Hospital Status Transport Dashboard, the **Transfer of Care module** is a web enabled system that records and tracks the transfer and acceptance of a patient to the Emergency Department. In addition to capturing the date and time stamp for the transfer of care at each facility, the TOC tool can be configured to capture delay reasons over a user defined threshold.

Performance by Individual, by Unit, or Shift

FirstWatch Performance Plus is an enhancement module to existing FirstWatch standard Performance Triggers. While standard Performance Triggers are great at providing the overall compliance perspective, they do not provide compliance monitoring at the various individual or specific component levels. For example – standard Performance Triggers can monitor overall Priority 1 calls processed within 45 seconds, ninety percent of the time. However, they cannot measure or monitor the individual Call-Taker’s performance against the same standard (John Smith’s performance).

The Performance Plus module is designed to do just that, by analyzing both the overall and the specific components that make up the overall compliance. By automating these performance measures, it increases situational awareness and early detection of potential problem areas, which in turn allows for early mitigation – resulting in improved performance, compliance, and operational efficiencies. Real-time alerts on individual performance keep your finger on the pulse of performance in your agency.

Example Performance Plus Triggers:

- Call processing times – performance by individual call taker
- Dispatch assignment – performance by individual dispatcher
- Total call processing performance – performance by individual
- Call-taker/dispatcher performance by priority
- Call-taker call completeness/accuracy
- Geovalidation by call-taker
- Call-taker overrides
- 1st unit assignment accuracy
- Unit/crew times – performance by unit, by station, by battalion, and individual

Workload Monitoring

Make informed, real-time decisions when sending your crews on calls based on their current total task time for that shift.

Online Compliance Utility (OCU)

The **Online Compliance Utility (OCU)** module is a web-enabled collaboration tool for use by Providers and Authorities to simplify and manage contract compliance for exceptions and exemption reporting. The web-based FirstWatch add-on tool provides interactive queues with a consistent “look and feel” for both the provider and the authority, allowing for on-line review and adjudication of late runs based on agreed upon business rules. Once business rules for call processing have been agreed upon, FirstWatch secures any changes to those rules unless agreed upon by both active participants (Authority and Provider). OCU is capable of capturing late response analysis, evaluating complex business logic, supporting documentation attachments and auto generated reporting output.

OCU Module Capabilities:

- The OCU module is capable of capturing late response data, supporting documentation and attachments, and provides flexibility for staff input.
- Records being initially placed in a presumptively “Late Call” category (queue) can be submitted for exception or exemption consideration once supporting information is supplied.
- A decision, based on the agreed upon protocols, can then be made with the OCU offering the ability to document the approval, denial or the request for further information. The OCU module also supplies the means for appealing any such decision.
- The Online Compliance Utility module is a “near real time” software tool that offers up to date compliance percentages, etc. precluding the more conventional “end of month” system analysis and reports.
- With the OCU module comes the output of monthly compliance reporting, documenting performance standards, penalties and fines as defined by the agency.

Important to note: As a neutral third - party, FirstWatch will only implement the OCU business rules as agreed upon by the Authority and Provider. FirstWatch secures any changes to those rules unless agreed upon by both active participants (Authority and Provider). This allows for transparency and collaboration between all involved parties.

OCU Reports:

The following reports come with the purchase of the OCU enhancement module:

1. **OCU Incident Detail** - one combined report with all the calls in OCU
2. **OCU Calls in Progress** - emailed daily to the provider and authority OCU users to show the OCU users if they have any calls in the OCU that they need to work
3. **Compliance Report** - shows the Contractual response time compliance summary based on the criteria for the contract which may be by Zone/Priority or City/Determinant
4. **Penalty Report** - shows the Contractual response time compliance and penalties based on the criteria for the contract which may be by Zone/Priority or City/Determinant
5. **Exemption Reasons** - report shows a count of how many exemption reasons were used for a given time period
6. **Response and Transport Summary** - summary of response and transport information for a given time period
7. **Mutual Aid Received and Given** - allows the provider to see how much mutual aid comes into the contracted areas and how much mutual aid the provider is providing outside the contracted area
8. **Late Reasons** - used internally by the Provider and is not made available to the Authority. Its purpose is to allow the provider to flag incidents that were late by the list of customizable reasons
9. **Reconciliation Report** - used to show which incidents are in the OCU based on qualifying criteria and which incidents did not qualify to be in the OCU

OCU Key Benefits:

- Real-time access to calls outside defined standards
- Web-enabled, late run call analysis completed anywhere
- Simple, universal tool designed for both Authority and Provider
- Automated rules designed to simplify and streamline the process
- 3rd party transparency
- Save time, money and resources

Testimonial:

“Before we implemented our FirstWatch OCU, I would spend 20-30 hours every month processing the late responses and exemption requests which included manually verifying the call information and personally calculating the penalty amounts by ambulance zone and then individually generating 10 invoices that were delivered via U.S. mail. Due to the time commitment, we were often 30-45 days behind in completing the process and getting the invoices sent out. Now, with OCU, I spend an hour or two a few times a month to go through the current late responses and exemption requests. FirstWatch generates the invoices and they are emailed to providers directly, which has reduced our invoicing process as much as 45 days. FirstWatch OCU has truly revolutionized our ambulance response compliance program.” – **Steve Carroll, EMS Administrator, Ventura County, CA**

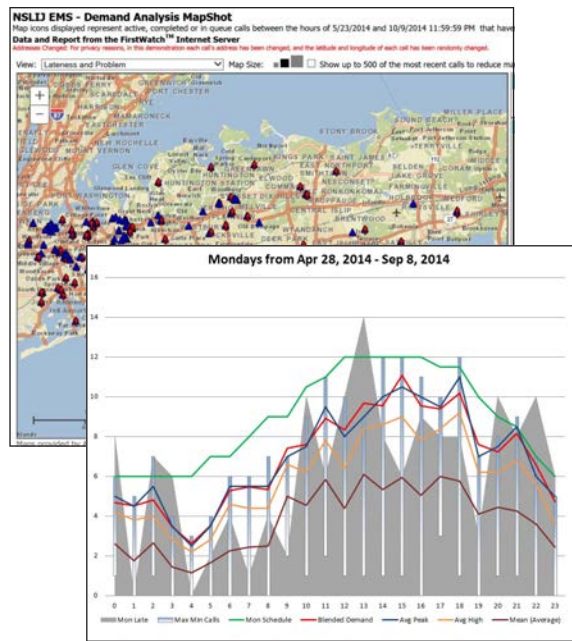

Demand, Consumption, and Analysis

One of the many challenges faced by agencies is making the most effective use of the resources they have available. A common way to forecast needs for staffing, scheduling and resource deployment is to analyze historical patterns of demand for service, both by day of week and hour of day and geographically. This time proven approach is referred to as "Demand Analysis."

Variations of this approach have been used for more than 20 years all around the world. In the past, the process of compiling and creating a complete temporal and geographic Demand Analysis was tedious, time-consuming, and too often, very manual.

FirstWatch has created a real time, dynamically updated and calculated Demand Analysis Module which offers views of select customer data. The Demand Analysis calculations in the data can be downloaded into an Excel spreadsheet, with all formulas intact. We're working to enhance the Demand Analysis module by adding a Demand Consumption-based approach, as well as addressing geographical demands by creating up-to-the minute problem/solution maps for each hour of the day and each day of the week and/or other user-defined intervals.

NEW: Mapping Features

Toggle on/off to layer different mapping components such as Battalion Chief Districts, Station Districts, Fire Districts, Population Density, Cities and Counties. Display calls by Top 10 Problems in order to see what/where your most common calls are happening.

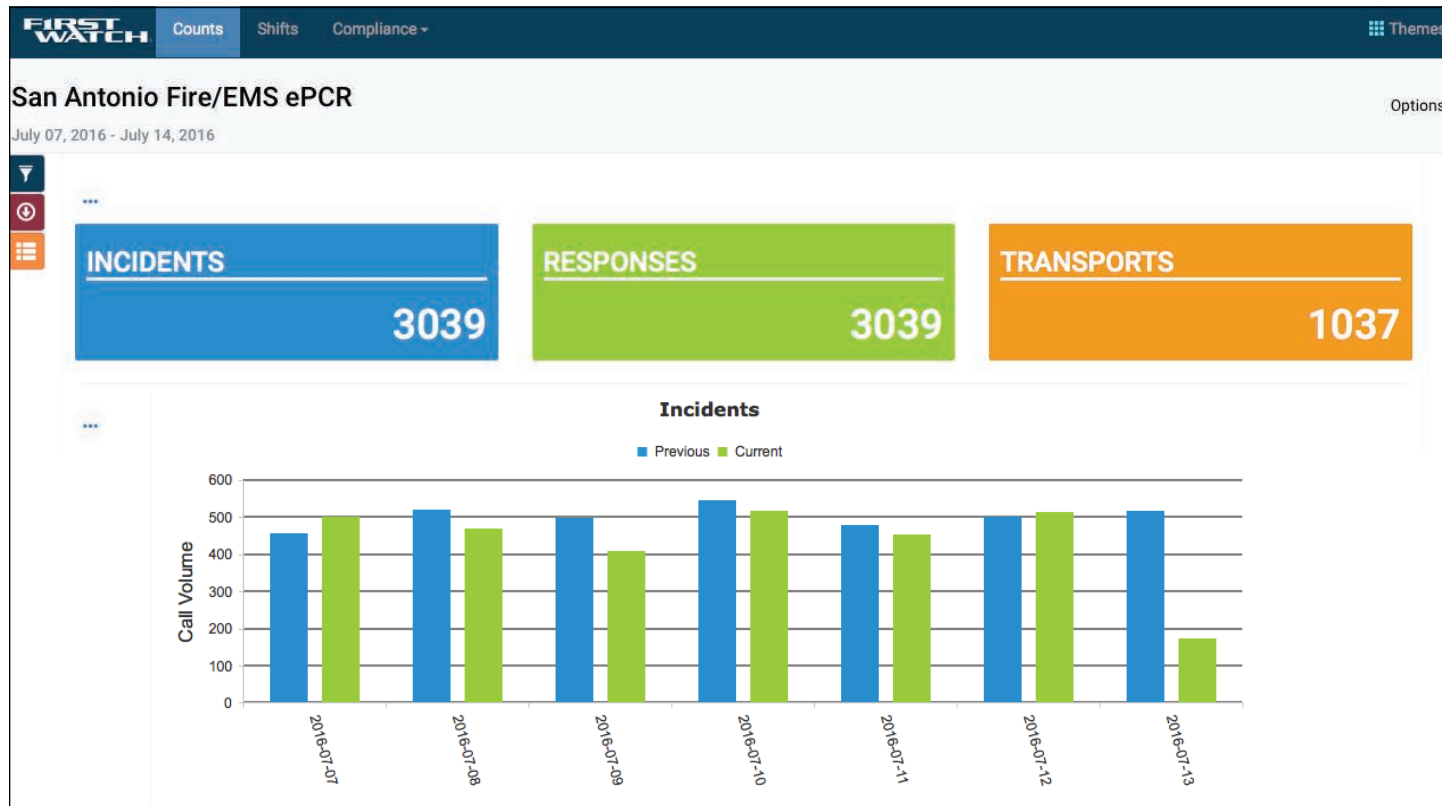

Heat maps with a sliding transparency scale

NEW: Interactive Data Visualization Tool (IDV)

IN DEVELOPMENT: Our NEW Interactive Data Visualization Tool (IDV) is a modernized look and feel that allows users to interact with the data that has been configured for a particular trigger. The end user is able to view or filter based upon the desired data elements:

- Ability to save customer filters or settings
- Volume and Response Compliance Interval breakdown by: Selectable data ranges (up to 5 years), Demographically, Day of week/hour of day, Station, Company, Shift, Battalion Unit
- Grouping data and comparing by previous day, month or year
- Flexibility in visual display allows user to change the display that is right for them
- Ability to view data in grid that allows the end user to modify the order or select the columns to display or apply custom filters and then export this information to Excel as needed.

Show Data in Grid

Export to Excel

Drag a column header and drop it here to group by that column

Automates Performance Improvement

Know how your system is performing on the things that matter most in near-real time.

The NEW FirstPass Dashboard includes a customizable display of a tiled summary of where your calls are in your FirstPass queues, and Statistical Process Control (SPC) charts for each of your system's Protocols.

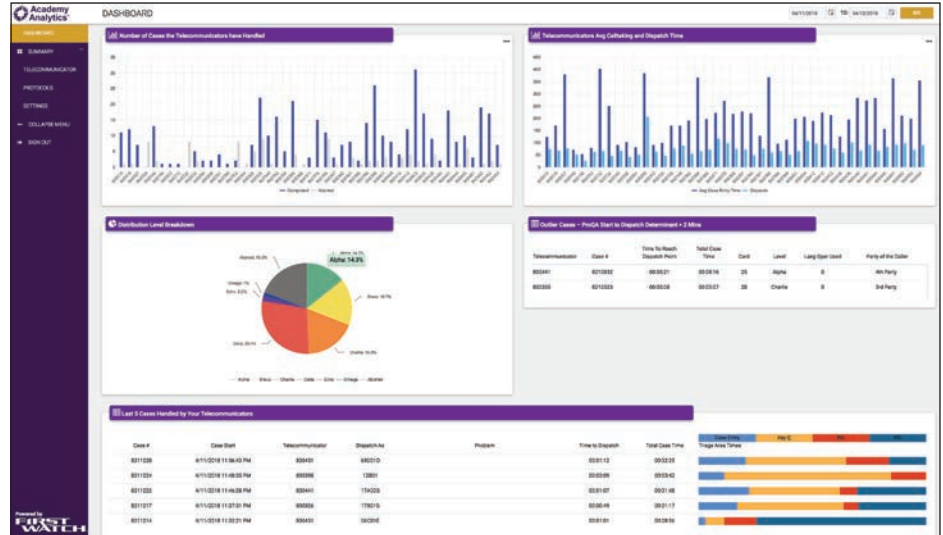

- Real-time Automated Performance Improvement - use one tool to monitor Protocol compliance, documentation, and improvement success
- Measure Protocol Compliance - Prioritize and monitor the protocols that are most important to your system
- Enhance Documentation Quality - real-time review of completion of required ePCR fields
- Provide Meaningful Feedback - ask questions and provide medics with feedback before they end their shift
- Save Time & Resources - Let the computer do the work and save the human for what is most important
- Monitor Medic Performance - Track individual performance to overall system objectives

Is there a Accepting Facility Name and Signature	✓	97.41%	[None]
Is there a Patient or Patient Representative Signature; or has the primary caregiver checked the affirmation that the patient could not sign, AND a reason patient unable to sign (PUTS) completed	✗	96.98%	[None]
If PUTS, is it confirmed by clinical condition/assessment	✓	100.00%	[None]
All Crew Members Signed	✓	93.87%	[None]
If O2 in Vital Signs, is it documented as a medication	✓	92.34%	[None]
Is the Narrative field size > 90 characters	✓	98.95%	[None]
Is the Validity >95%	✓	98.29%	[None]

Our newly enhanced ProQA Dashboard will give communications dispatch supervisors a quick and easy way to identify in near real-time their ProQA usage.

Product Features

- Seamlessly interfaces with ProQA/Paramount for EMD, Fire and Police
- FREE to existing FirstWatch customers with ProQA interface
- Multiple ProQA measures in one dashboard view
- Monitor Pre/Post caller instructions
- Determine if the appropriate dispatch level was assigned
- Improve call processing times
- Refreshes automatically!

Fire Operations Analytics Module (FOAM)

- The Fire Operations and Analytics Module provides fully automated and dynamic reporting of your Fire Department's Operational Metrics and Key Performance Indicators.
- Full integration with your Department's Standards of Cover and Strategic Planning Documents
- Provides GIS/Mapping display capabilities to illustrate community risks, demands and coverage.
- Data is integrated into a true Quality Improvement framework that tracks performance over time and identifies trends that require attention.
- Suite of dynamically updated and auto-distributed reports on operational performance factors including turnout and travel times and demand for services.
